MORGAN RUSHWORTH XLG 4020.3000 3.0KW MOVING GANTRY FIBRE LASER CUTTING MACHINE

The new XLG range of compact format moving gantry Fibre laser cutting systems takes plate cutting to a new dimension. A compact moving gantry machine that allows material to be processed with laser technology on a compact footprint.

The XLG uses new generation high performance linear system with geared head, high performance rack and pinion and its modular format allows for systems to be offered in 3000mm x 1500mm, 4000mm x 2000mm and 6000mm x 2000mm. With usage of Fibre laser technology there is no need to move the laser source or plate, thus allowing high speed and high accuracy cutting.
